Hollow Cromoly rails with stylish design features and a Synthetic cover.

#### **WTB COMP**

Steel rails with our most ergonomic designs and a Vinyl cover.

#### **WTB SPORT**

Steel rails with abrasion resistant corners and a Vinyl cover.

## SADDLE TECHNOLOGY DEFINED

1

#### **Love Channel™:**

Found on most WTB saddles, the Love Channel has one very important task: protect your body from un-wanted pressures. Unlike other more radical approaches, this central depression provides soft-tissue relief without sacrificing the design integrity of the saddle.

2

#### **DNA Padding:**

Found on our high-end models, this lightweight padding dramatically reduces the weight of the saddle. It is denser and has better memory properties allowing it to form to the contours of your active cyclist body. Found on all WTB Stealth and Team saddles.

3

#### **Flex-tuned™ shell w/ Comfort Zone™:**

A lightweight, supportive shell specifically engineered for comfort and performance. Our exclusive Comfort Zone™ cut-out provides additional relief from pressure on the sensitive areas.

4

#### **Soft-Shell w/ Comfort Zone™:**

A high-tech, dual-density saddle base designed for both enhanced comfort and proper support. This design minimizes trail vibration while helping absorb larger impacts. The reinforced nylon frame provides a rigid platform for efficient pedaling. Found on select Laser V, Speed V & Comfort V models.

5

#### **ProGel:**

Two intelligently placed Gel packets (think of implants) beneath the ischials (the sit bones) provide super-plush absorption characteristics. A great enhancement to our family of fine saddles, ProGel doubles your fun. Found on all WTB ProGel saddles.
